32 EMPLOYEE BENEFITS

The Company has classified the various benefits provided to employees as under:-

(a) Contribution to Provident Fund (Defined Contribution Plan)
The Company is not covered by The Employees Provident Fund and Miscellaneous Provisions Act, 1952, as the number of employees is less than the statutory minimum as required by the said PF Act.

(b) Contribution to Gratuity Fund (Defined Benefit Plan)
The Company has defined benefit gratuity plan (unfunded) wherein every employee is entitled to the benefit equivalent to 15 days of total basic salary last drawn for each completed year of service. Gratuity is payable to all eligible employees of the Company on retirement, separation, death or permanent disablement, in terms of the provisions of the Payment of Gratuity Act, 1972.

The most recent actuarial valuation of plan assets and the present value of the defined benefit obligation for gratuity were carried out as at March 31, 2021. The present value of the defined benefit obligations and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

(c) Compensated Leave of Absence Plan (Other Long Term Benefit Plan)
The Company permits encashment of leave accumulated by their employees on retirement and separation. The liability for encashment of privilege leave is determined and provided on the basis of actuarial valuation performed by an independent actuary at the date of the balance sheet.

Actuarial valuation was done in respect of the aforesaid defined benefit plan and other long term benefit plan based on the following assumptions-

Economic Assumptions
The discount rate and salary growth rate are the key financial assumptions and should be considered together; it is the difference or 'gap' between these rates which is more important than the individual rates in isolation.

Discount Rate
The discounting rate is generally based upon the market yields available on Government bonds at the accounting date with a term that matches that of the liabilities & salary growth rate. For the current valuation a discount rate of 7.60 % p.a. (Previous Year 7.70% p.a.) compound, has been used in consultation with the employer.

Salary Growth Rate
The salary growth rate usually consists of at least three components, viz. seniority, regular increments and promotional increase and price inflation. The assumptions used are summarized in the following table:

	Gratuity (Unfunded)		Compensated Absences Earned Leave (Unfunded)	
	2020-21	2019-20	2020-21	2019-20
Discount rate (per annum)	6.90%	6.60%	6.90%	6.60%

6. Sensitivity Analysis of the Defined Benefit Obligation:

Significant actuarial assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and mortality. The sensitivity analysis below have been determined based on reasonably possible changes of the assumptions occurring at end of the reporting period, while holding all other assumptions constant. The result of Sensitivity analysis is given below:

(Amount in Rs.'000)

Particulars	31st March 2021		31st March 2020	
	Increase by 1.00%	Decrease by 1.00%	Increase by 1.00%	Decrease by 1.00%
Impact of the change in Discount Rate (1.00% movement)	285.18	(394.33)	235.35	(327.52)
Impact of the change in Salary Increase Rate (1.00% movement)	395.47	(283.33)	328.61	(233.88)

Sensitivities due to mortality and withdrawals are not material and hence impact of change due to these are not calculated.

7. Description of Risk Exposures:

Valuations are based on certain assumptions, which are dynamic in nature and vary over time. As such the Company is exposed to various risks as follow -

A). Interest Rate Risk - A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability.
B). Salary Escalation Risk - Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of oblgation will have a bearing on the plan's liabilty.
C). Demographic Risk - The Company has used certain mortality and attrition assumptions in valuation of the liability. The Company is exposed to the risk of actual experience turning out to be worse compared to the assumption.
D). Liquidity Risk - This may arise due to non-availabilty of enough cash / cash equivalent to meet the liabilities or holding of illiquid assets not being sold in time.
